APPLICATION DEVELOPER

Ricky Nugraha

React.js / Full-Stack / AI-Assisted Development

Jakarta Selatan, Indonesia +62 813-8761-3515 rickynugraha1215@gmail.com

PORTFOLIO **GITHUB** **LINKEDIN**

Application developer with experience in React.js web interfaces, full-stack development, and AI-integrated applications. Independently built company websites, internal applications, and an IoT simulator from development through deployment. Uses ChatGPT and Codex to support implementation and debugging, with application testing and maintenance experience.

01 WORK EXPERIENCE

Junior Software Engineer - AI

Jun 2026 - Present

PT Hexacode Teknologi Indonesia

- Independently built Hexa.Simulator using Svelte/SvelteKit, Go, and database integration to simulate GPS devices and IoT sensors over MQTT, TCP, and HTTP.
- Developed Hexa Chat Live using Svelte, Go, and PostgreSQL, integrated with Hexa.AI services; contributed Python document ingestion, parsing, and chunking for RAG.
- Developed frontend and backend features, investigated bugs, and tested device scenarios covering signal loss, offline detection, and connection recovery.
- Supported application deployment and maintenance on Ubuntu Linux, including code updates, Docker environments, service checks, and troubleshooting.

Full Stack Developer

Feb 2026 - Jun 2026

PT Resvara Balawan Prakasa

- Independently developed the company profile website and internal ERP system, covering planning, frontend and backend development, data integration, and deployment.
- Built responsive web interfaces and database-connected features; debugged issues and maintained applications for internal business operations.

IT Support

Mar 2025 - Jan 2026

PT Tigris

- Provided computer, software, printer, and basic network support; maintained operational records and reports.

02 TECHNICAL SKILLS

Frontend React.js, Next.js, JavaScript, TypeScript, HTML, CSS, Sass, Tailwind CSS, Svelte/SvelteKit

Backend and data Node.js, Go, Python, Laravel, REST API integration, PostgreSQL, MySQL, SQL

AI-assisted development ChatGPT, Codex, AI-assisted coding (vibe coding), debugging, application testing

AI integration and delivery LLM integration, RAG, Git/GitHub/GitLab, Linux, Docker, SSH, Vercel

03 SELECTED APPLICATION PROJECTS

Warga BNH | Personal Project

TypeScript / JavaScript / Next.js (React) / Node.js / PostgreSQL / Tailwind CSS / Tesseract.js / Docker

Built a resident management application with local ID-card OCR and manual review, resident records, role-based access, TOTP MFA, audit logs, dashboards, reports and map views.

IMS Finance Frontend

LIVE DEMO >

React.js / Sass / Vercel

Independently developed financing forms, contract lists, and billing and penalty summaries. Brought client details, vehicle price, down payment, loan term, and installment dates into one interface.

Company Profile Website

LIVE DEMO >

React.js / CSS / Sass

Independently designed, developed, deployed, and maintained a responsive company website presenting services, projects, careers, and contact information.

ERP Management System

LIVE DEMO >

React.js / Sass / Vercel

Built a company-branded sign-in interface with credential fields, password visibility controls, a remember-me option, and navigation to registration and password recovery.

Hexa.Simulator

Svelte/SvelteKit / Go / PostgreSQL/MySQL / Docker

Built the frontend, backend, and simulation logic independently. Implemented virtual devices and test scenarios for telemetry, unstable connectivity, signal loss, and recovery.

Hexa Chat Live and Hexa.AI

Svelte / Go / PostgreSQL / Python / RAG

Developed AI chat application features and backend integrations. Contributed document ingestion, parsing, and text chunking to RAG workflows.

04 EDUCATION

B.Sc. in Informatics Engineering
Universitas Indraprasta PGRI / 2020 - 2024 | GPA 3.60/4.00

Computer and Network Engineering
SMK Kemala Bhayangkari Delog / 2017 - 2020

05 SELECTED TRAINING AND CERTIFICATIONS

Dicoding - Front-End Web Developer Expert
Dicoding - Fundamental Front-End Web Development
Dicoding - Back-End Development for Beginners
MSIB Batch 6 - Front-End Development (Dicoding)
